

I OBJECTIVE

Hard-working full-stack developer with professional background in healthcare. After deciding to make the leap into a web development career, I completed both self-study and fast-paced full-stack coding certificate course at UW. I pride myself in my ability to solve challenging problems in a creative, thoughtful, and persistent manner. My professional experience has included opportunities to work directly with people in collaborative team environments. Seeking opportunities to contribute to a web development team while continuing to build my skillset and experience.

I WORK HISTORY

University of Washington Medical Center **Physical Therapy Technician** 06/2021 – **Current**

- Worked with clinical team to ensure all needs of the patients were met at the highest level of care and customer service
- Provided support to physical therapists and administration team

ATI Physical Therapy **Operations Support Specialist II** 08/2020 – **06/2021**

- Administrative lead in charge of patient scheduling, billing, new patient intake, patient outreach, and clinic promotion
- Worked directly with patients to carry out established physical therapy treatment plans to help individuals meet personal goals, gain strength/mobility, and pain management.

Physical Therapy Technician 07/2018 – **03/2020**

- Work with patients and physical therapists to develop therapeutic exercise programs for patients recovering from various surgeries, injuries, and chronic pain management using patient-centered approaches
- Supporting administrative duties such as patient intake and scheduling
